Course Overview: This course intensively examines U.S. women's history between World War II and the 1970s. In doing so, it also explores understandings of womanhood, manhood and sexuality that became central to the cultural politics and social conflicts of the postwar period. By weaving together these topics – women's history, popular culture, and postwar social movements – we raise fresh questions about well-known episodes of U.S. history. Why, for example, do most Americans remember Rosa Parks only as a demure seamstress who initiated the Montgomery Bus Boycott because she was too tired to give up her seat to a white? If every young woman hoped to be like Donna Reed or June Cleaver in the fifties, then where did the sixties movements come from? We also explore how various groups (e.g., suburban girls, working-class women, civil rights activists, immigrants, and others) differently negotiated ideas of family, work and sexuality. In doing so, we examine roots of issues that continue to have political purchase today, such as reproduction, sexuality, job equity, welfare, race, and ethnicity.

Course Activities: This is primarily a discussion seminar, but class will occasionally include short lectures and films. Readings include historical documents, memoirs, scholarly articles and full-length historical studies. The course has a substantial writing component, and is designed to help you develop skills in historical writing and analysis. Students will write regularly to encourage critical engagement with the texts and class discussion of readings. Graded assignments include weekly reading summaries, a short media research paper based on popular magazines of the postwar era; and a “Postwar Women’s Memoir Project” based on interviews with women who came of age between World War II and the 1970s.
