This writing component course will examine the struggle for development in Latin America. In the first part of the course, we will examine critically some of the major theories of development. We will then analyze some theories that aim at explaining why Latin America has not developed as rapidly as some other parts of the world. In the final section of the course, we will examine some of the major development challenges that Latin America faces.

Students with disabilities may request appropriate accommodations from the Division of Diversity and Community Engagement, Services for Students with Disabilities, 471-6259, http://www.utexas.edu/diversity/ddce/ssd/  

REQUIREMENTS:

This course entails weekly reading and in-class writing assignments, an in-class examination on April 12, and a 15-20 page research paper. In addition, students will be expected to participate regularly in class discussion, to edit and comment on another student’s paper, and to make an in-class presentation of their research paper.

The research paper will be written in several stages. Students must turn in a one-page summary of their paper topic plus a one-page bibliography during the first week of April. A first draft of the paper is due on April 17 and the final paper must be turned in by May 9. The research paper should seek to explain some aspect of Latin America’s development that we have discussed in class. The papers may concentrate on individual countries or they may examine Latin America as a whole, but they must engage the theories that we have examined.

Grades for the course will be determined as follows: class attendance and participation (10%), in-class writing assignments (10%), mid-term examination (25%), first draft of paper (15%), class presentation (10%), peer review of first draft of paper (10%), final draft of paper (20%).

In order to calculate your final grade, I will sum all of the points you have received in the class and convert the points into letter grades using the following scale:

93-100 = A  
90-92 = A-  
87-89 = B+  
83-86 = B  
80-82 = B-  
77-79 = C+  
73-76 = C  
70-72 = C-  
67-69 = D+  
63-66 = D  
60-62 = D-  
Below 60 = F

I will round up scores of 0.5 and higher and round down scores of less than 0.5. I do not allow extra credit assignments and no exceptions will be made to the above system of converting points into letter grades.
Policy on Scholastic Dishonesty: Students who violate University rules on scholastic dishonesty are subject to disciplinary penalties, including the possibility of failure in the course and/or dismissal from the University. Since such dishonesty harms the individual, all students, and the integrity of the University, policies on scholastic dishonesty will be strictly enforced.
