History 340R covers the great age of European empires in the 19th and 20th centuries, when European powers established their rule over much of the rest of the world. We will look at British rule in India and Malaya, Dutch rule in Indonesia, French rule in Indochina, and American rule in the Philippines and involvement in Vietnam. We will also look at relations between Europeans and local peoples in terms of cultural contact, economic exploitation, and political domination, and the results of such relationships for both the Europeans and the Asians they ruled. The results, as we shall see, were far-reaching and are still with us today. We will also look at the 20th-century process of decolonization, as the old reasons for imperial domination lost their force, and as new national identities emerged in Asia.

Requirements for the course include the assigned readings, 2 map assignments, 2 book reports, a mid-term exam, and a final take-home essay.
