This is an introductory course to the study of international political economy. Its primary focus will be the reciprocal interaction between markets and political behavior in the international system. We will explore such questions as why do states trade? Under what conditions do governments restrict international commerce? How does capital mobility constrain national economic policy? What is the role of international organizations such as the IMF in fostering development? Do extensive natural resource endowments limit long-term economic growth? Does globalization promote peace? How does oil consumption threaten national security?

**COURSE REQUIREMENTS**

There will be three requirements for this course. First, you will be expected to attend class, keep up with the assigned readings, participate in our discussions, and complete short in-class writing assignments and/or quizzes. Second, there will be two mid-term examinations—the first given on Tuesday, October 9 and the second given on Thursday, November 8. Finally, a comprehensive final exam will be given during the assigned time on Monday, December 17 from 2 p.m. to 5 p.m. These requirements will provide the following components of your final grade:

- Attendance, participation, and quizzes: 20%
- Midterm 1: 20%
- Midterm 2: 25%
- Final: 35%

**READING MATERIALS**

The reading material for this course will be made available through two primary formats. First, our course blackboard site will contain electronic copies of our assigned article readings. Second, the following required texts are available at the University Co-op bookstore.

COURSE GOALS

I want to use the subject material of our course to get you thinking (i.e. criticizing, applying, extending) about explanatory “models” of international politics that generate intellectual leverage, or quite simply can explain broad patterns of social behavior with just a few variables or concepts. This might be new for many of you. This is not going to be a class designed to get you to memorize a bunch of facts about international relations so that you can succeed on a multiple choice exam. It is not about giving you the answers. I instead will raise challenging questions that have been debated (sometimes quite ineffectively) for centuries and then teach one style by which you can generate your own answers. In short, you will be graded on the effectiveness by which you evaluate arguments and draw implications from them—not on whether you can regurgitate what you have read or what I have said.

Build on this broad teaching approach, here is a set of more specific goals for our semester.

1. Enhance your understanding of the big questions in the study of international politics. Drawing on a variety of theoretical approaches, we will explore such questions as: Under what conditions do states embrace globalization? How do the distributional consequences of globalization shape its sustainability? How do global financial markets constrain policymakers? What political constraints hamper economic development? Does globalization enhance or diminish national security? How should the United States respond to the decline of its economic influence?

2. Enhance your ability to think in the abstract i.e. theoretically. All of our discussions and your written assignments will be oriented around this.

3. Sharpen your reading skills. The goal of your reading should not be to finish the article or the chapter. Instead it should be to prepare yourself to think critically and originally about the questions, theoretical claims, evidence, and implications of the material you have read. To this end, you will complete a series of short writing assignments designed to get you ready to participate actively in class discussions on our readings.

4. Practice generating implications (theoretical, empirical, policy) from theoretical priors/concepts.

COURSE POLICIES

Our class format necessarily creates mutual obligations among students to come prepared to discuss both the readings and the lecture materials. If only a few people in a group or the class are regularly doing the reading, our discussions will stumble as the bulk of students rely on a minority to carry them. Such a situation penalizes those students doing the readings as they then are pushed to shoulder more responsibility in class. To avoid this situation while fostering a stimulating and productive intellectual environment in class, I have established the following rules to ensure that all students meet these obligations to each other.

Classroom civility…As the instructor of record for this course, it is my responsibility to enforce this. Quite simply, I take this to mean that you will respect the right of your colleagues to ask questions and discuss their opinions about the subject matter of our course in class and that you will respect their right to listen undisturbed to the discussion in class. In short, if you are bothering others in the classroom by doing such things as watching videos on your computer or
talking to the person sitting next to you outside of our discussion groups, expect to be asked to leave the classroom.

*Attendance and participation*…will be tracked daily throughout the semester with two mechanisms—random quizzes and group discussion work. The quizzes will generally be comprised of one or both of the following parts. The first will include a small number of questions based on the assigned readings for the day and/or the previous lecture. The second component will be your entry from that day’s reading journal assignment.

*Reading journals* will be checked randomly throughout the semester as part of the in-class quizzes. You will write 150-225 word summaries of each reading that is marked by an asterisk (*) in the syllabus. These summaries should identify the key question that the author is trying to answer, the primary theoretical argument by the author(s), and a sample of the most important empirical evidence the author offers for his/her claims. Your summary of the theoretical argument should identify the independent (or causal) variable, identify the dependent variable (or thing to be explained), and describe the causal mechanism(s) that link the independent and dependent variables. These summaries should be typed and ready to be turned in at every class. *If you do not have the assignments with you to be turned in when quizzes are collected, you will not receive credit for that portion of the quiz. Related to this, we will NOT accept assignments via email for those days in which you know in advance that you will be absent.*

You will be expected to *participate* in class discussions and demonstrate that you have done the readings by performing such tasks as summarizing the main arguments, critiquing an author’s claims, drawing out policy implications, suggesting how an author’s argument may apply to another issue area, or highlighting similarities and differences with other readings. Class participation will be monitored via regular small group work. The makeup of these groups will change regularly throughout the semester according to quiz grades. Students that regularly come to class and keep up with the assigned readings will be put into discussion groups with other students that keep up with the readings. Students that do not keep up with the assigned readings will be placed into groups with other students that do not keep up with the assigned readings.

*Attendance and participation points cannot be made up under any circumstances, including excused absences.* However, each student in the class will receive a bonus at the end of the semester of 150% of the average daily points for this component of your grade. For example, if there are 100 attendance and participation points for the semester and these points were checked on 20 class days, then the average daily point total is 5. All students would receive a bonus of 7.5 points to account for excused and unexcused absences. *Note: your total attendance and participation score for the semester cannot exceed 100%.*

*Lateness.*…If you come late to class and miss an attendance check (sign-in sheet, quiz, journal collection), you have missed the attendance check for that day. Please do not ask to have your assignment collected.

*The determination of grades and grade appeals.*…This process must be initiated by your written explanation of why the decisions behind the assignment of your grade should be revisited. You will have one week after an assignment has been handed back to submit this written explanation. After that period, all grades will be considered final and any discussion that we might have will be restricted to how you can do better on the next assignment. Once you have submitted your written request, I will decide whether to regrade your entire assignment.
Please keep in mind that your past performance in other classes taken here at the University is not germane to any grading decisions made in my class. Consequently, if receiving a D in my class places you on academic probation, this does not constitute a viable justification for requesting the regrading of any assignment.

**Grade appeals also cannot be made on the basis of being “close” to a letter grade. Cutoffs between letter grades will be strictly observed according to guidelines listed below. Note: these already include appropriate rounding:**

92.5-100 A; 89.5-92.5 A-; 86.5-89.5 B+; 82.5-86.5 B; 79.5-82.5 B-; 76.5-79.5 C+; 72.5-76.5 C; 69.5-72.5 C-; 66.5-69.5 D+; 62.5-66.5 D; 59.5-62.5 D-; 0-59.5 F

“Scholastic dishonesty…includes, but is not limited to, cheating, plagiarism, collusion, falsifying academic records, and any act designed to give unfair academic advantage to the student (such as, but not limited to, submission of essentially the same written assignment for two courses without prior permission of the instructor, providing false or misleading information in an effort to receive a postponement or an extension on a test, quiz, or other assignment), or the attempt to commit such an act” (Section 11-802 (b), *Institutional Rules on Student Services and Activities*).

If you have any questions about what constitutes scholastic dishonesty, you should consult with me or the website listed below. Any student that violates this policy will fail this course and have the details of the violation reported to Student Judicial Services. ([http://deanofstudents.utexas.edu/sjs/academicintegrity.html](http://deanofstudents.utexas.edu/sjs/academicintegrity.html)).

**Documented Disability Statement:** The University of Texas will make reasonable accommodations for students with documented disabilities. Any student with a documented disability who requires academic accommodations should contact Services for Students with Disabilities at 471-6259 (voice) or 1-866-329-3986 (Video Phone) as soon as possible to request an official letter outlining authorized accommodations.

**Religious holidays:** By UT Austin policy, you must notify me of your pending absence at least fourteen days prior to the date of observance of a religious holy day. If you must miss a class, an examination, a work assignment, or a project in order to observe a religious holy day, you will be given an opportunity to complete the missed work within a reasonable time after the absence.

**Emergency evacuation:** In the event of a fire or other emergency, it may be necessary to evacuate a building rapidly. Upon the activation of a fire alarm or the announcement of an emergency in a university building, all occupants of the building are required to evacuate and assemble outside. Once evacuated, no one may re-enter the building without instruction to do so from the Austin Fire Department, University of Texas at Austin Police Department, or Fire Prevention Services office.

Students should familiarize themselves with all the exit doors of each room and building they occupy at the university, and should remember that the nearest exit routes may not be the same as they way they typically enter buildings.

Students requiring assistance in evacuation shall inform their instructors in writing during the first week of class. Faculty members must then provide this information to the Fire Prevention Services office by fax (512-232-2759), with "Attn. Mr. Roosevelt Easley" written in the subject line.
Information regarding emergency evacuation routes and emergency procedures can be found at http://www.utexas.edu/emergency.

*Changes to the syllabus*...I may make minor changes to the syllabus. These will be announced at least a week in advance.

The **final exam** will be composed of two extended essays. I will distribute four potential questions on the last day of class. These questions will be cumulative. At the start of the final, I will randomly pick two of the four questions. You must answer each of those questions.

*Makeup midterm exams*...will not be offered. In the advent of an extreme and verifiable medical or family emergency (to be determined in consultation with me and the Office of the Dean of Students), the in-class portions of your midterm will be rolled into your final examination grade. For example, if you miss the first midterm, your final will constitute 55% of your grade. Note however, that this option can only be used once. You must take at least two exams to receive a passing grade for the course.

**CLASS SCHEDULE**

**I. Introduction**

*Thursday, August 30*
Introduction

*Tuesday, September 4*
Thinking theoretically; What is globalization?

Rodrik, *The Globalization Paradox*, introduction and pp. 3-46

*Thursday, September 6*
Governance challenges in globalized economy

Collier, *The Plundered Planet*, pp. 3-36

**II. The politics of international trade**

*Tuesday, September 11*
Economic fundamentals: Standard trade theory and the costs of protection

Thursday, September 13
The political underpinnings of the global economy: hegemonic stability theory

Tuesday, September 18
International Institutions: GATT and the WTO

Rodrik, The Globalization Paradox, pp. 67-88

Thursday, September 20
The domestic politics of trade policy

III. The politics of international money

Tuesday, September 25
Introduction to money: interest rates, banks, the securitization of debt

Thursday, September 27
Monetary institutions: central banks

Tuesday, October 2
International money: the Unholy Trinity and the politics of exchange rates

Thursday, October 4
International money topics: the race to the bottom, sovereign wealth funds, and the IMF

**Tuesday, October 9**

MIDTERM

**IV. The political economy of the development**

**Thursday, October 11**

Introduction

**Tuesday, October 16**

Domestic institutions

**Thursday, October 18**

Trade and growth

Rodrik, *The Globalization Paradox*, pp. 159-183

**V. Natural Resources**

**Tuesday, October 23**

The Resource Curse

Collier, *The Plundered Planet*, pp. 37-78

**Thursday, October 25**

The Resource Curse (ctd)

Collier, *The Plundered Planet*, pp. 79-152

**Tuesday, October 30**

OPEC and the international politics of oil

VI. The Environment

Thursday, November 1
Common pool resources

Collier, *The Plundered Planet*, pp. 153-228

Tuesday, November 6
The growth/environment tradeoff; The politics of the climate control regime

Collier, *The Plundered Planet*, 229-244

Thursday, November 8
MIDTERM

VII. The political economy of national security

Tuesday, November 13
Globalization and peace I

McDonal, *The Invisible Hand of Peace*, pp. 1-76

Thursday, November 15
Globalization and peace II: Historical challenges and economic statecraft

VIII. The politics of economic crisis

Tuesday, November 20
Historical antecedents: The Great Depression

Thursday, November 22
Off for Thanksgiving
Tuesday, November 27
The Great Panic of 2008

Thursday, November 29
The legacy of 2008

IX. Global governance in an era of globalization

Tuesday, December 4
Globalization and the state

Thursday, December 6
Sustaining globalization
