If Obama had a vote, GOP would pick Perry

Texas governor may prove easier for than Romney

By Joan Shvald

AP News

The Governor of the United States is at the center of the political stage, and so in addition are Texas voters who hold the fate of the country in their hands. In the Republican primary, former Governor Mitt Romney and Texas Governor Rick Perry are vying for the nomination.

Perry, who is a former football coach and Baptist minister, is often seen as a conservative and a Christian. He has been a vocal critic of President Barack Obama and is known for his strong stance on issues such as immigration and healthcare.

Romney, on the other hand, has a more moderate political stance and is seen as a skilled businessman. He has been critical of Perry's fiscal policies and has been vocal about the need for deficit reduction.

A short course in why doctors need a longer education

By Dr. Stephen Soremekun

A community-oriented curriculum is needed to train doctors to provide quality care for patients, according to a recent report. The report, entitled "The Future of Medicine", states that doctors need to be more adaptable and flexible in their approach to patient care.

The report highlights the need for doctors to be able to communicate effectively with patients and to be able to work in teams. It also calls for an increase in the number of doctors who are trained in primary care.

The report recommends that medical schools should focus on developing skills in communication and teamwork. It also suggests that doctors should be encouraged to work in interdisciplinary teams.

In addition, the report calls for an increase in the number of doctors who are trained in primary care. It suggests that medical schools should focus on developing skills in communication and teamwork. It also suggests that doctors should be encouraged to work in interdisciplinary teams.

A new generation of doctors will be needed to meet the challenges of the 21st century. The report suggests that medical schools should focus on developing skills in communication and teamwork. It also suggests that doctors should be encouraged to work in interdisciplinary teams.
