

“INVENTORY SAME AS” COURSE RELATIONS GUIDELINES

DEFINITION:

“Inventory same as” course relations, or cross-listings, are permanent associations between courses in different fields of study and are published in the Graduate or Undergraduate Catalog. They should be established when the courses are added to the catalog course inventory and scheduled each semester the course is offered. “Inventory same as” courses share the following characteristics:

- Always the same in every way – title, degree plan statements, prerequisites, etc.
- Appear in the course schedule and the catalog with a “Same As” statement
- Students may not receive multiple credit toward a degree for inventory same as courses even if they were taken in a different semester under a different field of study with a different instructor.

Example:

Unique	Day	Hour	Room
40250	TTH	2:00 p.m.-3:30 p.m.	PAR 306

LIN 323L ENGLISH AS A WORLD LANGUAGE

An account of the spread of English around the world; national, social, and regional varieties.

Prerequisite: Nine semester hours of coursework in English or rhetoric and writing.

May be counted toward the global cultures flag requirement.

Designed to accommodate 35 or fewer students.

Same As ⓘ : [E 323L](#)

A student may not receive credit for a previously offered or future offering of E 323L once they have earned credit for LIN 323L.

CREATING “INVENTORY SAME AS” CROSS-LISTINGS:

“Inventory same as” cross-listings usually originate with a “home” academic unit requesting a cross-list with an affiliated field of study that has had prior consistent “schedule same as” relationships. This must be done during the appropriate catalog production year by the deadline. Courses must contain at least 30% of the guest discipline’s field of study content in order to be eligible for cross-listing. Guest departments/centers may impose a higher content percentage before granting approval. Both the “home” and “guest”

departments/centers must agree on all course statements before an online Course Inventory update may be submitted.

SCHEDULING “INVENTORY SAME AS” CROSS-LISTINGS:

Scheduling data, such as the meeting days, times, and room, should be entered into the system by each unit’s scheduler after the home has entered its data into Class Manager. Once it appears as a “potentially related class”, the relationship type to select will be “inventory same as”. The home unit must provide timely notification to guest units of any additions, deletions, or changes made to the course during each scheduling phase.

RESTRICTIONS:

The following inventory same as cross-listings require the approval of the Associate Dean for Academic Affairs before being added to the inventory:

1. A ROTC course with a non-ROTC course.

The following inventory same as cross-listings may NOT be added to the inventory:

1. A lower-division course with an upper-division course.
2. A law course with an undergraduate course.
3. A graduate course with an undergraduate course.
