Ethical and Professional Development (PSY 194Q)

Spring 2021, We 2:00–3:00 PM, hybrid

**Instructor:** R. Goris  
**Co-instructor:** Z. Boundy-Singer

**Office:** SEA 4.202  
**Office hours:** by appointment

**Content:**  
In this course, we will examine issues of ethics and professional development within the context of neuroscience and psychology. Working with both humans and animal model systems will be addressed. This will be a discussion-intensive course using a case study approach to reveal real issues in their natural complexity. Each class will be dedicated to a single topic, such as “Peer review”, “Conflict of interest”, “Research misconduct and policies for handling misconduct”, “Mentor/mentee responsibilities and relationships”, etc.

**Requirements:**  
Students will be required to read all the assigned reading material, and will be asked to participate in discussion and present some of the reading material during the semester. The grade will be based on the presentations and class participation.
