This course is an introduction to ancient Mesoamerica, the area roughly covering Mexico and the northern half of Central America, from the time of emerging social inequality in the Formative Period until the Spanish conquest of Mexico-Tenochtitlan in the sixteenth century. By studying archaeological evidence from several sites in this region we will address a few important theoretical issues in archaeology. These issues include: 1) the relationship between people, the environment, and social organization 2) the study of elites and commoners in archaeological cultures, and 3) the use of historical and archaeological data in reconstructing the past. During the course of the semester we will examine varied lines of evidence, including archaeological artifacts (especially pottery, obsidian, and ceramic figurines), human remains, architecture, murals, sculpture, and historical evidence (esp. codices and colonial accounts) to assess the role of evidence and theory in how we conceptualize the past in Mesoamerica. In addition, we will address issues that have captured the general public’s imagination in recent years, including the end of the world, the Maya collapse, human sacrifice, and others. Thus, the class will be of interest to archaeology majors and other students as well.

Goals of the course:
1. To provide an introduction to Mesoamerican prehistory and the main substantive and theoretical debates in Mesoamerican archaeology during the last several decades.
2. To increase student literacy in archaeology by creating an understanding of how archaeological evidence and theory are used in building models about life in the past.
3. To learn about the role of material culture in everyday life, the economy, and politics in ancient Mesoamerica.

Students with disabilities: Any student with disabilities should talk to me as soon as possible so that we may make arrangements that will make for a better learning experience and that will allow the student to show his or her abilities fully.
Other classroom rules:

No cellphones, laptops, newspapers, or calculators in class or during exams.

Academic dishonesty will be dealt with according to University rules. We will talk at length about issues related to academic dishonesty in class.

Grading: Successful completion of this course will require learning from readings, lectures, Power Point presentations, in-class exercises, and film. Topics covered in the readings and in the classroom will, at times, be entirely different. Written assignments will cover material, sites, and lines of evidence discussed in class and in the readings.

I will not post grades on the internet or give them to students over the phone or via email. I do not post lecture notes on the internet.

Instructions for reading responses will be given in class. Reading responses are due at the beginning of class. Once the lecture begins, responses will be late.

Students may discuss their exams with me individually. Students who request that I re-grade their exams, must present their request in writing. If I agree to re-grade their exam, students should be aware that their grade might suffer if I find errors that I did not find on my first grading. Therefore, students are advised to make sure they have specific reasons why their grade should improve before they challenge their grade.

Final grades will be calculated as follows:

1.: Reading responses: 20%
2.: Exam 1: 25%
3.: Exam 2: 25%
4.: Final Exam: 30%

Textbooks and other readings:

Course packet. REQUIRED. Available at Abel’s Copies.
Some of the readings are available online, including those marked as “On jstor”. To access readings on jstor follow these steps:

1. Go to a computer terminal on campus (the computer must be linked to the campus network).
