

**ANTHROPOLOGY 349C**  
**HUMAN VARIATION**  
**SPRING 2013**

**COURSE INFORMATION:** Unique #31365, 31370, and 31380  
MW 1-2 pm, CLA 0.112 (lecture)  
Th 10-11, F 10-11, or F 11-12, SAC 5.172 (discussion sections)

**COURSE INSTRUCTOR:** Dr. Deborah Bolnick  
E-mail: [deborah.bolnick@austin.utexas.edu](mailto:deborah.bolnick@austin.utexas.edu)  
Phone: (512) 471-7532  
Office Hours: SAC 4.148, Wednesdays 2-4 pm *or by appointment*

**TEACHING ASSISTANT:** Rick Smith  
E-mail: [rickwasmith@gmail.com](mailto:rickwasmith@gmail.com)  
Office Hours: SAC 4.166, Thursdays 11-1pm *or by appointment*

**COURSE DESCRIPTION:**

This course surveys the biological variation within and between human populations. After covering the basic principles of genetics and evolutionary theory, we will examine the genetic, physical, and behavioral traits found in our species. We will consider these traits from an anthropological and scientific perspective, and discuss the evolutionary and cultural processes that have shaped these traits. We will also explore how culture can influence our understanding of human biology, and we will discuss how studies of human variation have impacted society in the past and present. For all topics (especially controversial ones!), we will examine the scientific data and evaluate how the data have been interpreted in scientific journals and the popular press.

This class will be a mixture of lecture and discussion, and you will learn to understand and evaluate scientific studies of human variation. You will also improve your writing and critical thinking skills in this class.

**COURSE REQUIREMENTS:**

1. **Exam 1 (20%).** The first exam on **February 18** will cover material presented in the lectures, discussions, films, *and* readings. The exam may include multiple choice, matching, short answer, and essay questions.
2. **Exam 2 (20%).** The second exam on **April 1** will cover material presented in the lectures, discussions, films, *and* readings following the first exam. Exam format will be similar to that of the first exam.
3. **Final Exam (20%).** The final exam on **May 13 (2-5 pm)** will be comprehensive, but with an emphasis on material covered in the last third of class (after Exam 2). Exam format will be similar to that of the midterm exams.
4. **Research Paper (20%).** The research paper (7-9 pages, double-spaced) will allow you to explore a relevant topic of your choice in more detail. A research proposal, paper outline, and annotated bibliography (5%) are due on **March 4**. The research paper (15%) is due on **April 15**. Detailed instructions for the paper will be handed out in February.

**5. Class Participation and Reading Responses (16%).** This portion of your grade will be based on your participation in class activities and discussions. On discussion days, you are expected to have read the assigned readings BEFORE coming to class, and you will turn in a short (1 page, double-spaced) response to the readings in class. Reading responses will be graded based on the thought and effort put into the assignment, and will give you the opportunity to receive some informal feedback on your writing.

**6. Genetics Problem Set (4%).** This take-home assignment will be due on **March 25**.

**COURSE WEBSITE:**

Class information, handouts, and a discussion forum will be available at the course website on Blackboard (<http://www.courses.utexas.edu>). Course updates will also be sent to your university e-mail account. Please check both regularly.

**REQUIRED READINGS:**

1. Mielke, James H., Lyle W. Konigsberg, and John H. Relethford. 2010. *Human Biological Variation*. Second edition. Oxford University Press.
2. Course reader from Abel's Copies (715D West 23<sup>rd</sup> Street, 472-5353).

**CLASSROOM POLICIES:**

Every student has the right to learn and the responsibility to not deprive others of their right to learn. In order for you and your fellow students to get the most out of this class, please abide by the following policies: (1) Attend all classes and arrive on time whenever possible. (2) Do not use your cell phone, send emails, visit websites, or play games during class. (3) Please let me know if you have any problem that is preventing you from performing satisfactorily in this class.

**FEEDBACK POLICY:**

We will periodically ask for feedback on your learning, including through anonymous surveys. It's important for us to know your reaction to what we do in class, so please respond to these surveys and help us create an effective environment for teaching and learning.

**EMERGENCY EVACUATION POLICY:**

Occupants of UT buildings are required to evacuate and assemble outside when a fire alarm is activated or an announcement is made. Please be aware of these evacuation policies:

- (1) Familiarize yourself with exits to the classroom and building. The nearest exit may not be the one you used when you entered the building.
- (2) If you require assistance to evacuate, inform the instructor in writing during the first week of class.
- (3) In the event of an evacuation, follow the instructor's directions.
- (4) Do not re-enter a building unless you're given instructions by the Austin Fire Department, the UT Austin Police Department, or the Fire Prevention Services office.

**BEHAVIOR CONCERNS ADVICE LINE (BCAL):**

If you are worried about someone who is acting differently, you may use the Behavior Concerns Advice Line to discuss by phone your concerns about another individual's behavior. This service is provided through a partnership among the Office of the Dean of Students, the Counseling and Mental Health Center (CMHC), the Employee Assistance Program (EAP), and The University of Texas Police Department (UTPD). Call 512-232-5050 or visit <http://www.utexas.edu/safety/bcal>.

## **GRADING POLICIES:**

If an assignment is turned in late, the assignment grade will be lowered by 10% for each day that the assignment is late. If a serious issue (i.e. illness, family death, etc.) arises that may prevent you from attending class, turning in an assignment on time, or taking an exam, contact Dr. Bolnick by e-mail or phone as soon as possible to discuss an assignment extension or to schedule a make-up exam.

Final letter grades will be assigned using the following scale: A (90-100%), B (80-89%), C (70-79%), D (60-69%), F (0-59%). Plus/minus grades will be assigned.

**Re-grading Policy:** If you believe that an exam or assignment has been graded incorrectly, submit a written request for a re-grade to Dr. Bolnick within one week of when the graded exam or assignment was returned. The written request should include an explanation of your position and be attached to the graded exam or assignment. If you suspect that a simple addition error was made, speak to the instructor or TA to have the error corrected.

**Credit/No-Credit Policy:** To receive credit for this course if you enrolled on the pass/fail basis, you must 1) take the three exams, 2) turn in a paper proposal and research paper, and 3) receive the equivalent of a D or higher in this class.

**Academic Dishonesty:** Each student in this course is expected to abide by the University of Texas Honor Code. Any work submitted by a student in this course for academic credit must be the student's own work. You are encouraged to study together and to discuss information with other students. You can give or receive "consulting" help, but one student should never have possession of a copy of all or part of the work done by someone else (in electronic or paper form). Should copying occur, both the student who copied work from another student and the student who gave material to be copied will automatically receive a zero for the assignment. Similarly, you must do your own work during exams. Any collaborative behavior during exams will result in failure of the exam. Any cheating or plagiarism will be reported to the Dean of Students, and the penalty may also include failure of the course and University disciplinary action. For more information, see <http://deanofstudents.utexas.edu/sjs> and <http://www.lib.utexas.edu/services/instruction/learningmodules/plagiarism>.

**Accommodations:** Students with disabilities or a chronic illness may request appropriate academic accommodations from the Division of Diversity and Community Engagement, Services for Students with Disabilities at <http://www.utexas.edu/diversity/ddce/ssd>, 471-6259 (voice), or 232-2937 (video phone). Please notify Dr. Bolnick as soon as possible of any accommodations that will be needed.

**Religious Holy Days:** By UT Austin policy, you should notify Dr. Bolnick of your pending absence at least fourteen days prior to the date of observance of a religious holy day. If you must miss a class, exam, or assignment in order to observe a religious holy day, we will give you an opportunity to complete the missed work within a reasonable time after the absence.

**Attendance:** We do not formally take attendance, but we are aware of who comes to class and who does not. Attendance is necessary to earn points for class participation, and consistent attendance can help raise your grade if you end up with a borderline final grade. Whether or not you come to class, you are responsible for keeping up with what happens in class.

## SCHEDULE OF TOPICS, READINGS, AND IMPORTANT DATES:

DS = discussion section; *HBV* = Mielke et al. textbook; RR = Reading Response

\* indicates readings that must be completed BEFORE the week's discussion section

Date	Topic and Readings	Important Dates
1/14	Introduction	
1/16	Science and the Study of Human Variation <i>READING: Marks (2009), Marks (1996)</i>	
DS	<i>Race: The Power of an Illusion</i> , Episode 2 (Film) <i>READING: HBV chapter 1</i>	
1/21	<i>NO CLASS (Martin Luther King Jr. Day holiday)</i>	
1/23	History of Human Variation Studies I <i>READING: Marks (1995) chapters 1 and 3</i>	
DS	<i>Race: The Power of an Illusion</i> , Episode 1 (Film) <i>READING: Dupré (2008)</i>	
1/28	History of Human Variation Studies II <i>READING: *Marks (1995) chapters 4 and 6</i>	
1/30	Race Concepts in Anthropology and Biology <i>READING: *Morning</i>	
DS	<u>Discussion:</u> Race, Biology, and History	<b>RR #1 due</b>
2/4	Problems with the Racial View of Human Diversity <i>READING: *Goodman (1995)</i>	
2/6	Race as a Social Construct <i>READING: Fish, Lee, Yen</i>	
DS	<u>Discussion:</u> Race and Forensics <i>READING: *Sauer (1992), *Goodman (1997), *Risher (2009)</i>	<b>RR #2 due</b>
2/11	<i>Race: The Power of an Illusion</i> , Episode 3 (Film)	
2/13	Race, Medicine, and Disease <i>READING: Satel (2002), Kahn (2007), Gravlee (2009)</i>	
DS	Review for Exam 1; Research Paper Instructions	
2/18	<b>Exam 1</b>	<b>Exam 1</b>
2/20	Folk Heredity and Eugenics <i>READING: Marks (1995) chapter 5, Sinnott &amp; Dunn (1925)</i>	
DS	Genetic Basis of Human Variation <i>READING: HBV chapter 2, Ramagopalan et al. (2007)</i>	
2/25	DNA, Mutation, and Genetic Variants <i>READING: HBV chapter 2 (review) and pp 198-209</i>	
2/27	From DNA to Phenotype	
DS	<u>Discussion:</u> Metaphors and Genetic Essentialism <i>READING: *Nelkin &amp; Lindee (1995)</i>	<b>RR #3 due</b>
3/4	Population Genetics <i>READING: HBV chapter 3</i>	<b>Research Proposal &amp; Bibliography Due</b>
3/6	Evolutionary Forces and Genetic Variation I	
DS	Evolutionary Forces and Genetic Variation II	

<b>Date</b>	<b>Topic and Readings</b>	<b>Important Dates</b>
3/11-15	<i>NO CLASS (Spring Break)</i>	
3/18	Population History and Human Variation <i>READING: HBV pp 210-236 and chapter 13</i>	
3/20	Simple Genetic Traits: Blood Group Variants <i>READING: HBV pp 99-116</i>	
DS	<u>Discussion</u> : Microevolution Case Studies <i>READING: *Check (2006) or *Halverson &amp; Bolnick (2008)</i>	<b>RR #4 Due</b>
3/25	Simple Genetic Traits: Hemoglobin Variants <i>READING: HBV pp 133-137 and chapter 7</i>	<b>Problem Set Due</b>
3/27	Complex Traits: Skin, Eye, and Hair Color Variation <i>READING: HBV chapter 12</i>	
DS	Review for Exam 2	
4/1	<b>Exam 2</b>	<b>Exam 2</b>
4/3	<i>Cracking the Code of Life</i> (film)	
DS	<u>Discussion</u> : Contemporary Eugenics and Ethics <i>READING: *Harmon (2006), *Hayden (2011), *Stein (2012)</i>	<b>RR #5 Due</b>
4/8	Human Plasticity	
4/10-12	<i>NO CLASS (Instructor and TA at the AAPA Meeting)</i>	
4/15	Complex Traits: Human Body Form <i>READING: HBV chapter 10 and pp 260-280</i>	<b>Paper Due</b>
4/17	Complex Traits: Temperature and Altitude Adaptations <i>READING: HBV pp 280-290</i>	
DS	<u>Discussion</u> : Neandertal Cold Adaptation <i>READING: *Holliday (1997) or *Steegman et al. (2002)</i>	<b>RR #6 Due</b>
4/22	Complex Traits: Behavioral Variability and Athletic Ability <i>READING: HBV pp 344-348, Marks (1995) pp 237-243, Berkowitz (1996)</i>	
4/24	Sex and Gender Differences <i>READING: Hall (1991), Ripley et al. (2005), *Fausto-Sterling (2012)</i>	
DS	<u>Discussion</u> : Biological Basis of Sexual Orientation <i>READING: *HBV pp 348-353, *LeVay &amp; Hamer (1994), *Byne (1994)</i>	<b>RR #7 Due</b>
4/29	Intelligence, IQ, and Political Behavior <i>READING: HBV pp 354-363, Cohen (2002)</i>	
5/1	Deviance, Criminality, and Aggression <i>READING: Clark &amp; Grunstein (2000), Sapolsky (1997)</i>	
DS	<u>Discussion</u> : Biological Origins of Violence <i>READING: *Thornhill &amp; Palmer (2000), *Begley (2009)</i>	<b>RR#8 Due</b>
5/13	<b>Final Exam (2-5 pm)</b>	<b>Final Exam</b>
