Lisa Solomon writes about food—and about life, history and culture through her experiences with food. Her literary essays and feature articles have been published in several newspapers, national magazines and anthologies, and her holiday food columns have been published in dozens of media outlets across the country. Solomon will bring an assortment of homemade pastries to the Joynes Reading Room, to share with students as she discusses food writing. **Rowe-Koehl Travel Grant**

Do you have a great idea for a trip that is not directly tied to your academic career? The Rowe-Koehl Travel Scholarship might just be right for you.

This annual award is given to a Plan II student in good standing with the program whose travel promises to address the most interesting idea or question proposed. The award winner is determined by the Director and a committee of his/her choosing. Preference will be given to applicants whose travel will be abroad to a country or countries with which they have no close family ties or extensive previous experience.

Note that this scholarship is not intended to be coupled with an already-planned Study Abroad experience, nor is it intended to be coupled with or pay for a for-credit program. The spirit in which the award has been given is to encourage travel and learning in a non-traditional setting. For that reason, this is not a need-based nor is it a scholastic achievement grant. Grade point averages or financial need will not be considered, only the merit of the proposal.

Applicants should submit a single page description of their intended travel abroad, including an indication of their motivation and what their expectations might be to the Travel Grant coordinator, Philip Dubov, CLA 2.502. Submissions by email (planisscholarships@austin.utexas.edu) will be accepted, but one page only, please. The deadline is March 29th.

The award winner will be expected to write a letter of thanks as well as a brief narrative account of their travels. Photos are welcomed but are not required.

Junior Fellows Program

The Junior Fellows Program was begun in 1959 by Harry Ransom as a means of encouraging academic excellence in the College of Arts and Sciences. At that time it was essentially an honor society to which students were elected at the end of their freshman year. Over the years, the Junior Fellows has evolved into a society of juniors and seniors from the University at large who are engaged in independent research projects under the direction of
members of the faculty.

Fellows are required to attend meetings of the group, held every other week in both the fall and spring semesters. Besides project presentations, meetings feature discussions led by eminent scholars from on and off campus. Fellows have the opportunity to participate in field trips, seminars, and other academic activities. It is possible to earn academic credit for work done as a Junior Fellow, by enrolling in the appropriate conference course with the supervising professor. For example, Humanities and Plan II majors usually use their senior theses as their Junior Fellows projects. Students pursuing Special Honors in their major use the honors thesis number. Other non-honors courses are also available, for example ARH 376, E 367C, CH 475K, RTF 336. Fellows should register for the course that is approved by their advisers, fits into their degree plans, and has the right format for the chosen topic. Funds are available to assist Fellows with expenses involved in their research. There is also money available for Fellows who can demonstrate financial need.

Application Procedure

Application is open to any qualified student from any program on campus. Students must have completed 60 hours prior to the Fall semester. Junior Fellows normally have a GPA of at least 3.75, but outstanding students whose abilities are manifested in other ways should not hesitate to apply. Although administered by the College of Liberal Arts, the program is open to all qualified students on campus. Many students from outside Liberal Arts are presently members.

For more information contact Dr. Larry Carver (carver@austin.utexas.edu) in the Liberal Arts Honors Office by email or phone at 471-3458.

Applications are due Friday, March 21, 2014 for the 2014-2015 academic year.

Membership in Junior Fellows begins the fall semester following the spring recruitment period.

Flu Shots for Students

Getting a flu shot is the best way to prevent the flu.

The US Centers for Disease Control and Prevention recommend that everyone gets a flu shot every year, unless there are medical reasons they shouldn't. It takes about two weeks after getting the shot to have optimal protection. Flu season usually starts in October. The flu shot won't give you the flu. UHS administers the inactivated virus flu vaccine. The viruses in inactivated vaccine have been killed, so you can't get the flu from the shot.

Insurance billed for: Students with health insurance (except for HMO plans, plans underwritten by insurance companies based outside the United States, or government plans such as Medicare, Medicaid, and Tricare).

NOTE: If your insurance plan won't pay for a flu shot charge after UHS files a claim, the unpaid balance will be billed to you at your What I Owe. You will be responsible for paying that amount. Insured Students Only - Speed up your flu shot clinic check-in! Enter your insurance information in advance online if you haven't done so for a prior UHS visit at MY UHS: https://portal.uhs.utexas.edu/login_directory.aspx

**Integrative Biology Research Position**

Researcher in the Department of Integrative Biology seeks motivated undergraduates interested in contributing to research at the University of Texas.

Project Description: In many animals males provide a "nuptial gift" to females before or after copulation, which is presumed to increase the number and quality of offspring. Paradoxically, females in these same species often mate with many males, resulting in sperm competition for the eggs and mixed paternity of the broods. So why do males contribute to offspring that aren't theirs, and are they able to use environmental cues to estimate the risk of sperm competition and adjust their reproductive investment accordingly? This project will answer these questions using a variety of experimental manipulations.

Duties: Enumerating nuptial gift size, sperm number, sperm viability, and sperm length using microscopy. Maintaining the cricket colony

Qualifications: Minimum GPA 3.0.
